Butt & Parliament Hinges

Options for that authentic touch.

Dummy Butt Hinges (Optional)

Dummy butt hinges are an optional extra. They are designed to give the appearance of working butt hinges, without the cleaning and safety considerations, of working butt hinges. The rollers are concealed by the sliding sash, which overlaps and runs on the track like a monorail.

Dummy Parliament Hinges (Optional)

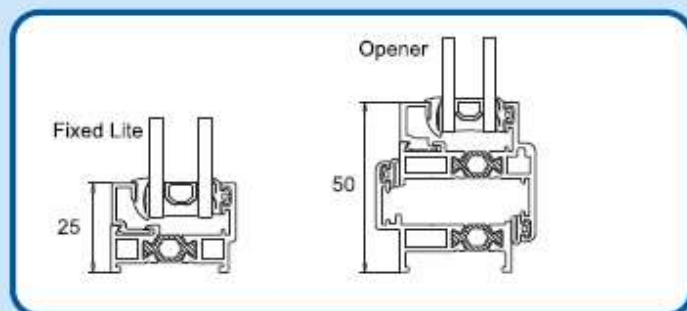

Dummy Parliament hinges are an optional extra. They are designed to give the appearance of traditional parliament hinges, projecting out from the frame, but without the safety considerations, of working Parliament hinges.

Working Butt Hinges (Optional)

Our Profile related working butt hinges will give you a truly authentic look, when the window is open and closed. In a closed position the hinges interlock and act as sash jammers. Used in conjunction with a Peg & Stay (not recommended for upper floors).
