Electric Integrated Blinds

Innovative Shading Solutions

Effortlessly Control Your Shading Solutions

Find the perfect balance between light and dark in every room of your property with Electric integrated blinds. Practical, stylish, sleek and efficient, our integrated blinds add the ultimate finishing touch to every building.

As homes, offices, and commercial properties become more connected with technology, so do electric blinds, by complementing new home technology with clever shading.

Simple, Efficient, and Remarkably Quiet

Controlling your integrated blinds unit with the motorised system couldn't be simpler. Unlike hard-wired systems, Our electric blinds have no unsightly wires or plugs and can be easily installed by your window installer.

The Electric blinds system combines a stylish design with no-fuss operational efficiency. At a touch of a button, you can manage the light and privacy by raising, lowering, and tilting your blind. The blind's mechanism, including the motor, is perfectly integrated in the top of the blind for a desirable appearance whilst maximising the glazed area of your doors and windows.

Ultra-Performance with Long Lasting Control

Our electric battery blind systems are designed and engineered to ensure the highest quality blinds with leading technology. The combination of years of research and development, excellent craftsmanship, and beautiful design has culminated in the perfect electric integrated blind.

Our integrated blinds are powered by a battery remote for effortless control of your privacy and light. Our blinds combines a sleek look with efficient and innovative mechanisms for smooth movement. To prevent power surges on our remote controls, there may be motion delays on multi-unit channels. The system is chargeable allowing you to power your shading, time after time. Synchronisation may also be affected by the individual battery power levels.

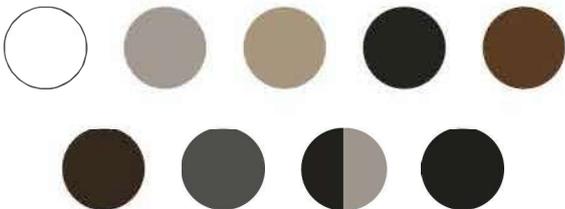

“Ordering is a breeze and the quality of their products are phenomenal.”

Mr M Stoskus

Personalised to your Taste, Style, and Environment

We understand and value the importance of aesthetics, so we offer many bespoke design options, from contemporary to classic finishes, plus a broad range of sizes for all windows and doors to suit your environment.

There are a variety of colour choices, as well as bespoke options using RAL colour codes. We can also create feature units including image printing on blinds, sign writing on blinds, and specialist glass for office partitions. Our electric integrated blind system offers one of the widest range of style choices on the market.

Make The Most of Your Property

Our integrated blinds are built with quality, style, and practicality to help you enjoy your living and working spaces even more. As a plug and play system, our electric integrated blinds can even be retrofitted.

Electric integrated blinds regulate energy, keep heat out in the summer, and reduce glare from direct sunlight.

There's minimal maintenance and cleaning required as our integrated blinds remain completely hygienic and dust-free. Plus, with no strings, they are child and pet friendly especially compared to conventional blinds.

Our blinds are suitable for a variety of different applications including windows, doors, patio doors, sliding doors, French doors, and conservatories.

Leading Quality, Design, and Manufacturing

Our team of experienced technicians, along with our customer service department, are here to help with any questions that you may have.

Our range of products have been specifically designed and precisely manufactured to provide high-performances IGUs combined with the highest levels of energy efficiency and excellent through-life operation. Our integrated blinds are argon-filled with low-e toughened glass and we have one of the most rigorous testing programmes of any integrated blinds manufacturers.

Our blinds are tested on 10,000 repetitive cycles for both lift and tilt functions.
