

Glass Garden Verandas

Transform your outside space

GLASS VERANDAS

CLASSIC RANGE

A garden the weather can't spoil . . .

Entertain no matter what the weather

Our weather is unpredictable at the best of times, however a garden veranda will shelter you from the elements. No more summer barbeques rained off, and with the addition of electric patio heaters and external lighting, you can turn your patio into a warm and dry space no matter what the weather has in store.

Garden furniture stays dry

A veranda keeps your patio dry all year round. Shielded from sun and rain your garden furniture will stay dry so there's no need to bring the cushions in.

Filter out harmful uv sun

Our new range of tinted glass, blocks up to 99% of the sun's harmful uv rays. Now you and your family can stay out in the warm summer sun, without the worry.

Maintenance free

- Powder coated aluminium

Powder coated aluminium profiles will not rust or corrode and the paint finish will last the life time of the veranda.

- Self cleaning glass

Our self cleaning glass option prevents dirt from building up on the surface of glass, making regular cleaning unnecessary.

Bespoke design

Every garden veranda we build is custom made for you. Our in-house design team use the latest software to design, process and manufacture your veranda to your exact specification. Together we can bring your ideas to life.

Why choose Us ?

We listen. Tell us your ideas and together we will design and build your perfect veranda. It will not just fit your home but will add to its character too.

All we need is an email and a photo to get things rolling. Once we have these we will either call or email you back with some ideas and prices.

Custom made verandas for your home

Each veranda, that leaves our factory, is custom made for you. Once measured we will make sure that your veranda will fit precisely into the space it was intended. We have a wide range of add-ons that allow us to fit a veranda in almost any space, why not speak to our design team.

Classic Range

Classic Range

Make your patio space your own . . .

Features to make your veranda stand out

The Classic and Nouveau range have features that will give your finished veranda that wow factor. The Classic has a range of cast aluminium moldings you can add to your design. Aluminium gallows brackets give strength and also add a nice finishing touch to the support posts, blending the leg into the roof with a gradual curve. The cast aluminium trellising, while not for everyone, does add that extra impact to the finished look. The Nouveau garden verandas can be supplied with a heavy duty front beam to allow for longer spans between posts, ideal for large open patios. We also offer aluminium guttering on the Nouveau range which gives a more substantial look to the veranda, both choices are available.

Colours.

Both our Classic and Nouveau range come in five colours, however we can paint to any RAL colour number. The RAL colour range has over 200 colours and shades which will allow you to match your own home's colour scheme perfectly.

Our standard colour range

White 9003

Rosewood Brown

Black 9005

Anthracite Gray 7016

Agate Gray 7038

Nouveau Range

Specialist installers, more care

Our specialist installers will install your garden veranda with the minimal amount of fuss and disturbance to you and your home.

Specialist equipment, less mess

Using diamond tipped core cutting equipment we can cut through your existing paving slabs leaving a neat hole for the support posts.

Tips for a great veranda:

- Using a long tape measure mark out the size of canopy that would best suit your needs.
- A veranda doesn't have to cover all of your patio. The ideal is to give you a sheltered "zone" for furniture and entertaining.
- Colour is important, we have a range of light and dark colours available so check our gallery on the coveredgarden.co.uk website to see what best suits your home.
- Email us with a photograph of the proposed location and some sizes and we will contact you with some options and suggestions.

Nouveau Range

Glass isn't just clear anymore

With our new, modern range of roof glass comes a number of upgrade options to consider. All verandas come with uV filtering safety glass as standard however you can now specify tints and self cleaning glass, to make life easier.

UvB filter glass removes harmful sun rays

We offer a range of glass units that now reflect heat as well as filter out the harmful, and damaging, uv rays of the sun. All glass will filter out some uv rays, however we now offer a range of glass specially designed to block the harmful uv B radiation in the sun rays. Sun block bronze glass will stop 95% of the harmful uv B radiation. Ask our sales staff for more details

Self cleaning glass

Pilkingtons have developed a new range of sealed units with a self clean coating bonded to the external surface of the glass. Because the coating is bonded to the glass, during the manufacturing processes, it's permanent and will last for the life of your veranda. No more dirty roof glass and less cleaning for you, sounds too good to be true.

Garden Verandas

Outside Living

WHICH STYLE IS RIGHT FOR YOU?

Each style of veranda, be it the Nouveau or the Classic, can be custom designed to fit in with your own home's features.

Nouveau

With square posts and a larger front eaves beam, the Nouveau range of verandas have a contemporary style with a more modern feel. The larger front eaves beam means that the Nouveau range can span larger distances between support posts, for an uninterrupted viewing area, ideal for larger patios. And whilst ideal for entertaining the Nouveau is very practical, keeping garden furniture dry and out of the elements. Cushions and fabric covers can stay out all summer.

Nouveau Grey 7016

Classic

The Classic range comes with Edwardian style supports posts. Each support post has a pair of cast aluminium gallows brackets either side to add strength and a decorative look. The Classic is made up of powder coated aluminium profile which give it a maintenance free finish that will withstand the harsh elements of our British weather. The Classic will work in harmony with both older and more modern homes alike, and although a little more in price than the Nouveau, the Classic's styling more than makes up for it in "wow" factor.

Classic White 9003

Protect your garden furniture

Whilst a veranda is primarily an outdoor dry space for entertaining or relaxing in your garden it is also very practical. The double glazed glass units protect you and your furniture from the harmful and damaging uV rays of the sun. Your garden furniture stays dry and protected with no need to store all of your cushions away the moment it rains. Finally you can have an area outside that stays dry no matter what the weather brings.
